

VALVELINK SHORT COURSE

Course CD20

The primary focus of this lecture/lab style course is to provide the student with a working knowledge and experience in managing Fisher Controls' DVC's using AMS ValveLink software.

Overview

ValveLink Short Course (Course CD20) is a 1-day course intended for technicians, engineers and others responsible for installing, calibrating and basic troubleshooting FIELDVUE and related instruments using the 275/375 Handheld Communicator. The primary focus of this course is to provide experience in managing DVC's using the Hart 275/275 Handheld Communicator.

Prerequisites

Some experience with process instrumentation and control is helpful.

Topics

- FIELDVUE Theory of Operation
- DVC5000 & DVC6000
- HART Model 275/375 Handheld Communicator
- Instrument Configuration and Calibration
- Instrument Troubleshooting
- Control Loop Wiring Practices & Tri-loop
- ValveLink Overview
